
AI Applications Portfolio

Bridging Theoretical Philosophy with Technical Implementation

Github Link : <https://github.com/Syedayan17/Portfolio-for-Class-Artificial-Intel-Application-ITAI-2372.git>

Muhammad Ayan Syed

AI Strategy & System Integration Expert

Technical Implementation

AI-Based Sentiment Tracker

Development of a sophisticated financial news crawler and sentiment analysis engine.

- Automated web scraping of real-time market data
- Natural Language Processing (NLP) integration
- Synergy of Blockchain and AI for secure data
- Tools: Python, Web Crawlers, Neural Networks

Strategic Analysis Highlights

Fraud Detection

Analysis of enterprise-level AI deployments at JPMorgan Chase for risk mitigation and banking security.

Smart Cities

Evaluation of AI infrastructure role in optimizing urban transportation systems and public safety logistics.

Ethical AI

In-depth research into the "Abuse of AI" and development of frameworks for responsible innovation.

Industrial Impact Potential

Healthcare & Finance

Leveraging augmented intelligence for patient diagnostics and implementing sentiment-driven trading signals.

Retail & Agriculture

Optimizing inventory through Computer Vision and revolutionizing crop growth with precision AI analytics.

Focused on delivering ROI through industry-specific AI implementation strategies.
